

## **UI/UX Design - Volunteer Specialist**

MCR Pathways is transforming education outcomes for care-experienced young people across Scotland. We're looking for a creative, meticulous volunteer UI/UX to support our award-winning team on a new system that will make our programme more scalable. We are looking for a volunteer who could start on this short-term project as soon as possible to have it ready for end of Q1 2020..

The volunteer will have the opportunity to work on a creative, wide-reaching, high visibility project that will transform the delivery of our Talent Tasters programme..

### **The role will include:**

- UI design for an app used by young people and our staff
- UX mapping and optimising user journeys.
- Working with our brilliant Tech team

This role will include a full induction, with ongoing support throughout the project. This opportunity will give a volunteer to meet new people, an opportunity to develop their portfolio and be part of an exciting project.

### **Time commitment**

Ideally, we'd like someone who could volunteer at least one full day a week in our Central Office at the Mitchell Library, Glasgow. However, remote work could be an option. Remote volunteers would preferably be able to visit our central office occasionally for project check-ins.

### **About MCR Pathways**

For nearly a decade, MCR Pathways has been working in secondary schools in Glasgow helping care experienced young people overcome their challenges and create bright futures. MCR supports them to find, grow and use their own talents and skills.

**Please send your portfolio to Mandy:  
Mentor Engagement and Volunteer Services Manager:**
